

## UAH25-30-M

The a|VariMount UAH25-30-M is an innovative optomechanical mount designed for seamless integration and precise alignment of optical components with a outer diameter of 30 mm - like asphericon's BeamTuning products. This mount eliminates the need for additional adapters, reducing set-up length and minimizing the risk of tilt and decentration. It is compatible with 30 mm cage systems from manufacturers such as OptoSigma, Thorlabs and Qioptiq (Linos), and can be easily mounted on various rail systems. The design ensures a broad surface clamping of optical components, reducing stress and deformation, and includes M4 and M6 threaded holes for compatibility with all post systems.
